REQUEST FOR QUALIFICATIONS

SECTION I: INTRODUCTION

Spokane Regional Transportation Council (“SRTC”) requests submittals from qualified firms with expertise in transportation planning, transit, engineering, and public involvement for a General Planning Consultant to assist in tasks identified in the agency’s Unified Planning Work Program (hereinafter “the Project”). Electronic submission of qualifications will be accepted until **5:00 PM (PST)** on **Monday, December 4, 2023**.

SRTC is the federally designated Metropolitan Planning Organization (MPO) and Transportation Management Area (TMA) for the Spokane Metropolitan Planning Area in Washington. At the state level, SRTC is the designated Regional Transportation Planning Organization (RTPO). As the MPO and RTPO, SRTC coordinates regional transportation planning within its planning area of Spokane County. Spokane County is located in eastern Washington state and consists of 1,781 square miles with a current population of 554,000.

Federal legislation (23 CFR 450.306) requires MPOs to develop long-range transportation plans and Transportation Improvement Programs (TIPs) through a continuous, cooperative, and comprehensive planning process, and consider implementation of projects, strategies, and services that are consistent with the long-range plan. In addition, the MPO supports national transportation goals, increasing the accountability and transparency of the Federal-aid highway program, and improving project decision-making through performance-based planning and programming.

SRTC is guided by a Board of Directors, consisting of 20 voting members who are either elected officials or member agency executives, and 2 ex-officio (non-voting) members. SRTC staff consists of eleven technical and administrative personnel led by an Executive Director and Deputy Executive Director.

SPOKANE REGIONAL TRANSPORTATION COUNCIL

Spokane, WA

General Planning Services

The Spokane Regional Transportation Council (SRTC) is seeking qualified firms to assist in its transportation planning projects and programs.

Intent of Solicitation:

It is the intent of SRTC to select and negotiate a General Planning Services Contract with one (1) or more firms. The consultant(s) or consultant team will be chosen based upon the expertise and experience listed as it pertains to the work described in the Scope of Services, and a third-party contract will be entered with the consultant(s) to perform general planning services.

Term:

The expected term for the General Planning Services Contract will be for three (3) years, beginning at the time of contract execution. At the discretion of SRTC, there will be an option to extend the term for two one-year periods. This will be reviewed at the conclusion of the initial three-year term, and if applicable, at the conclusion of the first one-year extension.

Scope of Services:

SRTC requires services to provide support for transportation planning activities currently set forth in its Unified Planning Work Program (UPWP). The consultant(s) shall function as an extension of SRTC staff by providing qualified technical and professional personnel to perform duties and responsibilities assigned under the terms of the agreement.

The work involves assistance on a task assignment basis in a variety of technical, graphic, planning, and product review activities. The Scope of Services include, but will not necessarily be limited to, the following tasks:

Task 1 – Assessment of Regional Transportation Needs

To prepare for the next Metropolitan Transportation Plan (MTP) update, SRTC will evaluate certain transportation elements to identify areas of need and highlight emerging trends for policy focus and future investment. New planning activities are identified in the UPWP to address this:

- A. Smart Mobility Plan – This work effort will consider existing and emerging technologies and ways to leverage transportation benefits from a performance, operational, readiness, and sustainability perspective. This includes assessments of Intelligent Transportation Systems (ITS), connected and automated vehicles, freight delivery, micromobility, electric vehicles and clean fuels, and the infrastructure needed to support such systems.
- B. System Resiliency Assessment – With climate adaptation and hazardous scenarios in mind, this task assesses the transportation system through the lens of resiliency and infrastructure vulnerability to extreme weather events, climate change, and natural and human-made disruptions.
- C. Scenario Analysis – To help understand policy choices, evaluation of potential scenarios is suggested as part of the needs assessment. This task may be embedded in Task 1A concerning various levels of technology adoption and investment and extend to other areas such as financial forecasts/revenue, land use, and resiliency.
